MoonRAY 

Personal Wireless Desktop 3D Printer

MoonRAY

Fast. Precise. Wireless.

MoonRay S is designed with your creative process in mind. Our advanced printing technology elevates personal desktop 3D printing to new levels of quality, precision, functionality, and flexibility. MoonRay S works with our intuitive RayWare Wireless software and custom-formulated resins to simplify the printing process and streamline your workflow, while delivering accurate parts with ultra-fine details.

This unparalleled combination helps accelerate the transition from idea to reality.

Minimum Feature Size
100 Microns
Print Every Detail

Custom-Built Projector
405nm
Blue-Violet Light Engine

Minimum Layer Thickness
20 Microns
Superior Surface Finish

Durable Resin Tank
Up to 50 Liters
Extended Lifetime

Fast Printing
1 in/hour
Consistent Print Speed

Build Size
130 x 80 x 200mm
Print Tall Parts

MoonRAY Materials

Dental Grey Resin

Our grey resin has been designed to make finishing easy. Your parts will print ready to paint, no primer necessary. We've formulated our grey resin to be completely neutral - it doesn't lean warm or cool.

Clear Resin

MoonRay Clear Resin is an excellent choice for engineers, as it allows you to see all of the inner workings of your prototyped part.

Orange Resin

This bright, eye-catching orange resin is our original standard resin. It has been formulated to provide an excellent surface finish and print ultra-fine details.

Castable Resin

MoonRay Castable Resin allows you to print models to use for investment casting. For best results, read our guide to castable resin. It is easy to work with and leaves no residue or ash after the burnout process.

Surgical Guide Resin

Our biocompatible Surgical Guide Resin allows you to print precise and accurate drill guides for use in guided implant surgeries. Guides printed with MoonRay Surgical Guide Resin remain true to the original dimensions of your surgical guide model to ensure a proper fit and placement.

White Resin

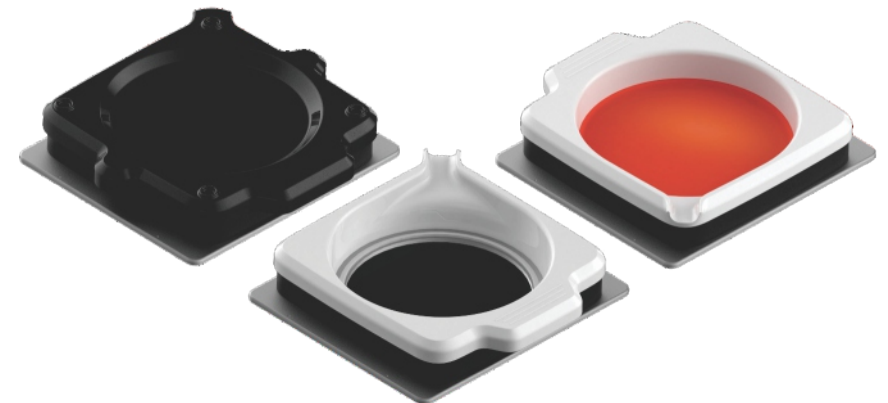

This resin's bright white color produces beautiful parts, straight from your MoonRay. It also makes a great base for painted parts.

Designed and Calibrated for MoonRay

Finely Tuned for the Ultimate Finish. Our functional resins are made for MoonRay and allow you to print high-resolution parts. Pick the one that fits your application.

What's in the package:

MoonRay S 3D Printer
1 Liter of Standard Resin
RayWare Software Access
Resin Tank
Spare Resin Drum
Build Platform
Finishing Kit
Power Supply
Ethernet Cable
1 Year Limited Warranty
Online Customer Support

SprintRay Inc.
Los Angeles, California
